

LABORATORY REPORT - COMPREHENSIVE METABOLIC & BIOMETRIC PROFILE

QUEST DIAGNOSTICS & REFERENCE LABORATORIES

CLIA ID: 10D0987654 | CAP Accredited: #7192834
Medical Director: Robert Vance, M.D., FCAP
Facility: 1400 Health Science Blvd, Suite 300, Miami, FL 33136 | Tel: (800) 555-0199

PATIENT & SPECIMEN INFORMATION

Patient Information	Specimen & Order Information
Name: GONZALES, MARIA	Specimen ID: SP-2026-0910-9421
DOB: 05/14/1984 (Age: 42)	Requisition #: REQ-7738209
Gender: Female	Collected: 09/10/2026 07:15 EDT (Fasting: Yes, 12h)
Patient ID / MRN: ANT-849201	Received: 09/10/2026 09:30 EDT
Phone: (305) 555-0192	Reported: 09/10/2026 11:00 EDT
Ordering Physician: Dr. Marcus Sterling, M.D.	Client Account: ANTARES Health Center (Acct #9941)

CLINICAL LABORATORY TEST RESULTS

1. Glycemic & Metabolic Panel

Test Name	Result	Units	Reference Interval	Flag
Fasting Glucose	105	mg/dL	70 – 99	HIGH
Hemoglobin A1c (HbA1c)	5.8	%	4.0 – 5.6	HIGH
Estimated Average Glucose (eAG)	120	mg/dL	68 – 114	HIGH

Note: ADA Diagnostic Criteria — Fasting Glucose 100–125 mg/dL indicates Impaired Fasting Glucose (Prediabetes). HbA1c 5.7%–6.4% indicates increased risk for diabetes (Prediabetes).

2. Clinical Vitals & Hemodynamics

Vital Sign Parameter	Result	Units	Reference Range	Status
Systolic Blood Pressure (SBP)	134	mmHg	90 – 120	High
Diastolic Blood Pressure (DBP)	86	mmHg	60 – 80	High
Heart Rate (Resting Pulse)	78	bpm	60 – 100	Normal
Oxygen Saturation (SpO2)	97	%	94 – 100	Normal
Body Temperature	36.6	°C	36.1 – 37.2	Normal

3. Anthropometric & Body Composition Assessment

Biometric Metric	Value	Units	Reference Standard	Flag
Body Weight	70.2	kg	Target	Normal
Height (Stature)	162.0	cm	Adult reference	Normal
Body Mass Index (BMI)	26.7	kg/m ²	18.5 – 24.9	Overweight
Body Fat Percentage	32.8	%	21.0 – 32.0	High
Waist Circumference	86.0	cm	< 80.0	High
Hip Circumference	102.5	cm	Reference	Normal
Wrist Circumference	16.2	cm	Reference	Normal

INTERPRETATION & PHYSICIAN COMMENTS

- **Metabolic Finding:** Fasting glucose (105 mg/dL) and HbA1c (5.8%) reflect persistent impaired glycemic control (Prediabetes).
- **Cardiovascular Finding:** Blood pressure reading (134/86 mmHg) reflects Stage 1 Hypertension per ACC/AHA guidelines.
- **Recommendation:** Lifestyle modification, carbohydrate intake restriction, exercise routine, and follow-up in 90 days.

Electronically Signed By:

Robert Vance, M.D., FCAP — Medical Director
